Experience

HumAIn HumanLed AIPowered (May 25 - July 30, 2026) – Quezon City, Metro Manila **AI Engineer Intern**

- **Location Type:** Remote
- Configuring AI Voice Implementation and documentation as an intern, utilizing skills and knowledge in AI workflows.
- Programming SaaS (Software as a Service) and Nx Monorepo for integration of all systems in one repo. Using Angular, TypeScript, JavaScript, and n8n for AI automation workflow.
- Utilizing the AI Gemini Voice Library and implementing it in the SaaS Dashboard, reflecting admin voice options and configurable with PostgreSQL, Firebase, and Supabase as cloud databases.

Studypool (2026 - Present) – Quezon City, Metro Manila **Freelance Programmer**

- **Location Type:** Remote
- Aiding students with their programming-related assignments and activities.
- Freelance programmer in Java, SQL, and other IT-related topics.
- Part-time source of income while still a student.

Projects

Cogito: PDF Quiz & Flashcard Synthesizer **Full-Stack AI Engineer**

- **Tech Stack:** Gemini API, React.JS, JavaScript, Supabase, PostgreSQL
- **Link:** https://cogito-five.vercel.app/
- An AI-based reviewer generator for students. It uses an AI API to analyze the documents uploaded by the user and generate flashcards and quizzes as the reviewer.
- Integrated different features such as: Difficulty Levels, where you can choose from easy, medium, or hard cognitive levels; score tracking that views your quiz results and performance history; session history that you can revisit all past study sessions anytime; and Google authentication, which is a secure login via Google OAuth.

PlantCam: Mobile-Based Plant Disease Detection with Smart Recommendations **Full-Stack Developer**

- **Tech Stack:** JavaScript, Python, TensorFlow, Tailwind CSS, React.JS, MIT App Inventor
- **Link:** https://plantcam-promotional.vercel.app/
- Engineered an AI-driven plant disease diagnostic system, split into a responsive frontend promotional platform and a functional mobile application.
- Integrated custom on-device AI classification models powered by Python and TensorFlow to analyze botanical visual data and return instant diagnostic insights.

Lance Kent: Personal Portfolio Web Application **Full-Stack Developer**

- **Tech Stack:** React.JS, Tailwind CSS, JavaScript, Shadcn UI, Figma, Vite
- **Link:** https://lancekent.dev
- Engineered a minimalist, high-performance personal portfolio website using React.JS and Vite to showcase technical engineering blueprints and development highlights.
- Designed an Apple-style "Bento Grid" layout in Figma, translating high-fidelity interactive prototypes into a fully accessible interface with Tailwind CSS and Shadcn UI for components.

Skills

- **Technologies:** JavaScript, Java, SQL, PostgreSQL, PHP, C#, React.JS, Tailwind CSS, Vite, ASP.NET, Python
- **Tools:** Git (Version Control), GitHub, Trello, Figma, Canva, Supabase, VSCode
- **Certifications:** GitHub Foundations, Legacy Responsive Web Design (freeCodeCamp), Exploratory Testing + Mob Testing, DataCamp AI Fundamentals, DataCamp AI Literacy, AI Career Readiness, Agentic AI Developer

Education

2023 – Present **Quezon City University** **Quezon City, Metro Manila**
Bachelor of Science in Information Technology

2019 – 2021 **Rosario Institute** **Rosario, Cavite**
Track-Information and Communications Technology with Specialization in Computer Programming
