Experience

DEVCON Manila Chapter **July 5, 2026 - Present**
Frontend Developer Intern *Quezon City, Metro Manila*

- Volunteered as a remote frontend developer for the DEVCON Tech Office, specializing in Next.js, React, Tailwind, and shadcn for creating a friendly UI assigned to the Event Website Department.
- Assisted in visualizing the current project workflow and designed system architecture using flowcharts, UI designs using Figma, and diagrams for requirements alignment and project visualization.
- Developed a project management website referencing a Kanban Board for tracking and monitoring projects, designed for all members of the event website department for centralized task delegation.

Hytec Power, Inc. **September 02, 2026 - October 30, 2026**
Frontend Developer Intern *Quezon City, Metro Manila*

- Contributed to the development and maintenance of the Optimized Work Plan (OWP) system using Angular 19, TypeScript, and RESTful API while managing development through Jira and GitHub platforms.
- Modernized and standardized the Angular codebase by auditing existing implementations, consolidating dependencies, and migrating legacy patterns to Angular 19 code practices.
- Developed and enhanced admin dashboard components, improving filtering, searching and data management.

HumAIn **May 25, 2026 - July 30, 2026**
AI Engineer Intern *Quezon City, Metro Manila*

- Developed and optimized highly customizable, multi-modal AI Voice Chat Agents tailored for diverse enterprise use cases, including automated interviewers, receptionists, and smart schedulers.
- Enhanced user immersion by integrating real-time live tone analysis and dynamic voice-type configurations (e.g., Zephyr), significantly improving conversational naturalness and empathy detection.
- Architected and implemented an AI Agent Scheduler utilizing an n8n workflow from Google Cloud Console and an API for data. Automated synchronization of real-time client bookings with Google Calendar seamlessly.
- Programmed SaaS (Software as a Service) and an Nx Monorepo for integration of all systems in one repo. Using Angular, TypeScript, and JavaScript for development; Gemini Live API for voice settings.
- Authored advanced system prompts and engineered context-aware guardrails to build highly unique, brand-aligned AI personas with minimal response latency for potential clients and use cases.

Projects

eHakbang: Your Digital Life-Event Guide *https://ehakbang-app.vercel.app/*
System Designer/Full-Stack Developer

- Developed the Hackathon project using the OpenAI API, EGOV API, Next.js, PostgreSQL, Node.js, and Git.
- Designed a life-event–driven digital service that helps citizens navigate government processes triggered by major life events, such as marriage, childbirth, employment, retirement, or winning a lottery.
- Came up with the idea and designed the system flow, including authentication, data processing using the EGOV API for integration, and the system's potential impact on the community.
- Integrated with the EGOV SSO API for authentication, liveness check, EGOV AI for centralized information processing, chatbots, and the eMessages API. With these integrations and through the technical evaluation, we became one of the Top 30 Finalists of the EGOVPH Hackathon 2026 nationwide.

Skills

- **Technologies:** JavaScript, Java, SQL, PostgreSQL, n8n, C#, React.js, Next.js, PHP, Laravel, Vite, .NET, Python, Git, GitHub, Tailwind CSS, Bootstrap, Angular, TypeScript
- **Focus:** Full-Stack Development, AI Agent Orchestration, UI/UX Design, Software Architecture
- **Certifications:** GitHub Foundations, Legacy Responsive Web Design (freeCodeCamp), Exploratory Testing + Mob Testing, DataCamp AI Fundamentals, DataCamp Data Literacy***,*** AI Career Readiness***,*** Agentic AI Developer, TESDA NCIII Java Programming, Front-End Web Development with Angular

Education

Quezon City University | Bachelor of Science in Information Technology **2023 – Present**

- **Key Achievement:** EGOVPH Hackathon 2026 Top 30 Finalist (Representing QCU)
- Huawei Future Innovators Camp Participant

Rosario Institute | ICT with Specialization in Computer Programming **2019 – 2021**

- Graduated with High Honors
